Caleb's Internal Team's Copywriting System

1.2x

7 min ⚡ 5 min 37 sec

Overview

This is the exact training system we use internally to produce publication-ready content in 20-25 minutes per article. Follow this step-by-step process to create content that includes proper internal linking, external authority links, fact-checking, and passes AI detection tests.

What's Included

Downloadable Excel Sheet

- Complete step-by-step workflow with descriptions for each stage
- Use this as your checklist while producing content

Video Training

- Full walkthrough of the entire process from start to finish
- Watch how we actually produce content in real-time

100 External Authority Domains

- Pre-vetted list of high-authority domains for outbound links

Creating a Content Planner

AI-Rewriting Pages

- Outline generation prompts for each content type (supporting, category, service, geographic, landing pages)
- General content writing prompt (customize for each specific client with their GBP details)

The Complete Workflow

1. Access the copywriter email account and request Claude "magic link"
2. Open the Content Brief (delivered via email)
3. Open the corresponding Claude Project for outline generation
4. Gather necessary inputs for the outline prompt
5. Generate outline in the relevant outline project
6. Copy outline to the client-specific Claude project
7. Generate initial content draft
8. Prompt Claude to fact-check its own content
9. Prompt Claude to double-check the fact-checking
10. Read, review, and reprompt as necessary for quality
11. Find a high-authority external link from the provided list
12. Prompt Claude to insert the external link contextually
13. Check ZeroGPT score (must be under 50%, ideally under 40%)
14. If score is too high, reprompt Claude to revise
15. Copy final content into the Content Brief
16. Final quality check: verify links are present and content is reasonable
17. Email completed content to Content Manager

Key Results

- **Time reduction:** 60 minutes → 20-25 minutes per article

- **Ready to publish:** Includes all elements (internal links, external links, passes AI detection)
- **Scalable:** Clear process that new team members can follow immediately

Important Notes

- This training is still being refined - you may notice some rough edges
- The video mentions inserting external links as superscripts, but the current process uses regular inline links
- Each client needs their own Claude project with GBP information (name, address, phone, categories, services)
- Outline projects are reusable across clients; client projects are specific to each business
