Core 30 Content Audit

3:51

When you take on a new local SEO client, one of your first tasks is understanding what content they already have and what's missing. This lesson will show you how to perform a comprehensive content audit that aligns with the Core 30 structure we've been building throughout this course.

This audit process helps you:

- Identify existing content that fits the Core 30 framework
- Discover content gaps that need to be filled
- Create a clear action plan for content development
- Ensure proper site structure for local SEO success

Prerequisites

99+

1. **Screaming Frog SEO Spider** (free for sites under 500 URLs)
2. **Access to ChatGPT o1** (or Claude as an alternative)
3. **The client's Google Business Profile information**
4. **Basic text editor or Word processor**

Overview

Prompt 1: Skeleton

Prompt 2: GBP Landing Pag...

💡 **Note:** While ChatGPT o1 performs better for this analysis task, Claude can handle it effectively if you don't have a ChatGPT subscription.

Step-by-Step Audit Process

Step 1: Gather Homepage Content

Start by collecting the client's homepage content:

1. Navigate to the client's website
2. Select all content (Ctrl+A or Cmd+A)
3. Copy the content (Ctrl+C or Cmd+C)
4. Paste into a Word document or text file
5. Save this for later use

Step 2: Collect Service Information

Next, gather the services from the client's Google Business Profile:

1. Access the client's GBP
2. Click on "Services"
3. Copy all listed services
4. Keep this list handy for the prompt

Step 3: Run Screaming Frog Analysis

Now it's time to crawl the website:

1. Open Screaming Frog SEO Spider
2. Enter the main domain (e.g., example.com)

4. Wait for the crawl to complete

Once finished, export two critical files:

Export 1: Internal URLs

- Navigate to the "Internal" tab
- Click "Export"
- Select "Internal - All (CSV)"
- Save the file

Export 2: Links Data

- Navigate to the "Links" tab
- Click "Export"
- Select "All Links (CSV)"
- Save the file

Step 4: Prepare Your AI Prompt

Use the provided prompt template (available in this lesson) and customize it with:

- The client's secondary services/categories
- The complete list of services from their GBP

Step 5: Run the Analysis

1. Open ChatGPT o1 (or Claude)
2. Paste your customized prompt
3. Upload the three files:
 - Homepage content document
 - Internal URLs CSV
 - Links CSV

Step 6: Handle Common Issues

It's common for ChatGPT to initially claim it can't read the CSV

Then, the AI will typically then process the files correctly using Python

 **Important:** This extra step is almost always necessary with ChatGPT o1. Be patient and persistent.

Understanding the Output

Your content audit will reveal several key insights:

Missing Category Pages

The analysis will identify which service category pages are absent, such as:

- Drainage service category page
- Gas service category page
- Heating contractor category page

Homepage Gaps

The audit will show:

- Which services aren't linked from the homepage
- Which services aren't mentioned in homepage content
- Internal linking opportunities being missed

Service Page Analysis

For each GBP service, you'll learn:

- Which service pages exist
- Which are missing
- Which need improvement

99+

The analysis concludes with:

- Summary of all content gaps
- Priority order for content creation

- Specific next steps for implementation

Pro Tip: This level of detailed analysis is typically reserved for clients or near-clients. For initial prospects, consider a simpler content review to save time.

Next Steps

After completing your Core 30 Content Audit:

1. **Create Missing Category Pages:** Start with the high-priority category pages identified in the audit
2. **Update Homepage Content:** Add mentions of missing services and improve internal linking
3. **Build Service Pages:** Develop individual pages for each missing service
4. **Review Site Structure:** Ensure your content aligns with the Core 30 framework

Prompt: Core 30 Content Audit

1

Data Inputs

99+

links_all.csv

internal_all.csv

- **Homepage Content:** [Paste the homepage copy here or provide a reference]
- **GBP Categories** (primary + secondary):
 - Primary: Plumber
 - Secondary: Drainage Service, Gas Installation Service, Heating Contractor
- **Services:**
 - [List each service...]
- **City Name:** [e.g., Anytown]

2. Analysis Goals

- For **each secondary GBP category**, confirm there is a dedicated URL whose **title tag** and **H1 tag** includes the keyword phrase in the format "GBP Category" + "City Name" plus additional context (e.g., "Plumbing Services Anytown | Expert Installation & Repair").
- Check that the **homepage**:
 - Mentions each of the secondary categories in the copy.
 - Has an **internal link** to each secondary category page.
- For each **service**, ensure there is a dedicated URL whose **title tag** exactly includes "Service City Name" plus additional words (e.g., "Drain Cleaning Anytown | Quick & Reliable Service").

99+

link from that category's page to the specific service page.

3. What to Output

- Provide a list of **missing pages** or **title tag gaps** (i.e., any GBP category or service that does not have its corresponding dedicated URL with the right format).
- Identify if the **homepage** is missing mentions or internal links to any secondary categories.
- Show any **services** that do not have a dedicated page or the required exact-match title tag.
- Highlight if any **category pages** are missing links to the relevant service pages.
- Summarize all **gaps** in a clear, bulleted list so it's easy to see where the website does not match the intended structure.
