Glossary

Core SEO Terms

SEO

Search Engine Optimization - The practice of improving your website's visibility in search engine results pages (like Google) to attract more organic (unpaid) traffic.

SERP / Search

Search Engine Results Page - The page displayed by search engines in response to a user's query. This includes organic results, paid ads, featured snippets, and other elements.

Click Through Rate (CTR)

The percentage of people who click on your link after seeing it in search results. Higher CTR signals to Google that your content is relevant to searchers.

AI

Artificial Intelligence - Computer systems that can perform tasks typically requiring human intelligence, such as understanding language and generating content.

AI SEO

Research, and optimization strategies.

Google Business Profile

GBP / GMB

Google Business Profile (formerly Google My Business) - A free tool that allows businesses to manage their online presence across Google, including Search and Maps.

NAP / N-A-P

Name, Address, Phone - The three critical pieces of business information that must be consistent across all online listings to build local SEO authority.

SAB / Service Area Business

A business that serves customers at their location rather than having customers come to them (like plumbers or mobile mechanics). These businesses can hide their address on Google.

Link Building & Authority

Backlink / External Link

A link from another website pointing to your site. These act as "votes of confidence" and are crucial for building domain authority.

Internal Link

Links within your website that connect one page to another. These help users navigate and distribute SEO authority throughout your site.

99+

The clickable text in a hyperlink. The words used in anchor text help search engines understand what the linked page is about.

Technical SEO

Schema / Schema Markup / Structured Data

Code added to your website that helps search engines better understand your content. It can result in rich snippets and enhanced search results.

Geotag

Location data embedded in images that tells search engines where a photo was taken. Important for local SEO to prove geographic relevance.

Sitemap

An XML file that lists all important pages on your website, helping search engines discover and crawl your content more efficiently. Essential for larger websites or those with complex structures.

Content & Strategy

E-E-A-T

Experience, Expertise, Authoritativeness, Trustworthiness - Google's framework for evaluating content quality. Critical for ranking in competitive niches.

Core 30

99+

key topics to establish topical authority.

YMYL / Your Money Your Life

Google's classification for websites that could impact a person's health, financial stability, safety, or happiness. These sites face

stricter quality standards and require exceptional E-E-A-T to rank well.
