Overview

Prompt 0: Planning

Lovable HTML: NEEDED to ...

=====

===

1. Branding & Design

- Use BUSINESS NAME from site architecture
- Use COLOR SCHEME defined above
- Typography: Clean, trustworthy, appropriate for the industry
- Design feel: Professional but approachable local business — not corporate

2. Header

- Top bar: "Serving [CITY], [STATE] & Surrounding Areas" on left, [PHONE NUMBER] on right (click-to-call)
- Main header: Logo on left, navigation center, phone button on right styled as primary CTA
- Sticky header on scroll

3. Navigation

Use NAVIGATION STRUCTURE from site architecture:

- Simple and clean — no dropdowns
- All nav items link to defined URLs

4. Footer

- Phone number prominent (click-to-call)
- Address: [CITY], [STATE] [ZIP CODE]
- Email: [EMAIL]
- Service areas: List all SERVICE AREAS from architecture
- Quick links: Home, Services, About Us, Contact
- Social icons placeholder (Facebook, Google)

Non-Local SEO ▼

- Thumb-friendly button sizes

6. Page Creation

Create ALL pages listed in the site architecture:

- Homepage (URL from architecture)

- Main Pages (Services, About, Contact)

- All Secondary Category Pages

- All Core Service Pages

- All Child Service Pages listed under each category/core service

- All General Service Pages

7. Placeholder Content

Each page should display ONLY:

- The page title (e.g., "[Service Name] [City] [State Abbrev]")

- Text: "Content coming soon"

- The header and footer

Do NOT write actual content for any page. We will build that out in subsequent prompts.

8. Services Page Structure

On the /services page, display a complete list of links to ALL service pages, organized by category as defined in SERVICE HIERARCHY. This allows verification that all pages were created.

9. Scroll Behavior (Critical)

When navigating between pages, the browser must scroll to the top of the new page. Implement a ScrollToTop component that resets scroll position to (0, 0) on every route change. Users must always land at the top of each page.

10. Technical Requirements

- Fast loading

- Clean semantic HTML5

- All navigation links working between pages

99+

- Consistent header/footer across all pages
- EVERY page listed in the architecture must be created as an actual route

11. Verification

After creating the site, confirm:

- Total number of pages created matches PAGE COUNT SUMMARY from architecture
- All routes are accessible
- Navigation works correctly
- ScrollToTop is functioning

Generate the complete site structure with all pages created and navigation working. Do not add content beyond the placeholder text specified above.
