How to Structure the Core 30

1.5x

5-min ⚡ 3 min 35 sec

The Core 30 is your foundational website structure for local SEO success. This lesson breaks down exactly how to organize your site's content hierarchy to maximize local search visibility.

The Core 30 represents the essential pages every local business website needs to establish topical authority and geographic relevance. Think of it as your site's backbone—without it, you're missing critical ranking opportunities.

Overview

Single Location Businesses:

- Homepage = GBP Landing Page
- Target keyword: [GBP Primary Category] + [City Name]
- Example: "Plumber Houston" or "Plumber Chicago"

Multi-Location Businesses:

- Homepage remains separate
- Create individual GBP landing pages for each location
- Each landing page targets its specific location

💡 **Pro Tip:** Your title tag and H1 should include your exact match target keyword, but you can add additional words for context. Example: "*Find Out Why We're the Best Plumber in Chicago 2025*"

The Core 30 Structure Breakdown

1. GBP Landing Page (Homepage for Single Locations)

Your GBP landing page serves as the hub for all your services and categories. Structure it with:

- **Target Keyword:** [Primary Category] + [City Name]
- **Subheadings:** One for each GBP category (up to 10 total)
- **Content Blocks:** 50-100 words under each subheading
- **Internal Links:** Link from each block to its dedicated category/service page

Related Lesson: Review [GBP Categories](#) to understand how to select and optimize your Google Business Profile categories effectively.

3. Service Pages

Build individual pages for each service you offer:

- **Minimum Recommendation:** 11+ service pages
- **Target Keywords:** [Service Name] + [City Name]
- **Example:** "Water Heater Replacement Houston"

Special High-Priority Services

For critical, high-margin services (limit to 2-3):

- Link directly from the homepage
- Track rankings separately in your rank tracking tool
- Common examples for plumbers:
 - Water heater replacement
 - Main drain line replacement

4. Locations Page

A standard locations page listing all your service areas or business locations.

Beyond the Core 30: Building Relevance

Once your Core 30 is complete, evaluate your rank map to determine next steps:

AI-Rewriting Pages

- **Example:** "How Much Money Does a Plumber Make in Houston?"
- **Linking:** Connect these pages to relevant service pages

When topical relevance is strong but you need broader geographic coverage (purple in diagram):

- **Target Keywords:** [Primary Category/Service] + [Geographic Landmark]
- **Examples:**
 - "Plumber River Oaks" (neighborhood)
 - "Plumber I-10 and 610 Interchange" (major landmark)
- **Purpose:** Expand your visibility across the service area

▶▶ **Related Lesson:** Check out [Building More Geographical Relevance](#) for detailed strategies on geographic expansion.

Multi-Location Considerations

For businesses with multiple locations, the Core 30 multiplies:

- **3 Locations = Core 90:** Build complete structures for each location
- **Prioritize Based on Rank Maps:** You might not need to complete all 30 pages for every location
- **Watch for Patterns:** Location 2 might achieve good topical relevance before Location 3 finishes its Core 30

⚡ **Efficiency Tip:** Use your rank tracking data to guide content priorities. Don't build unnecessary pages if your
