Content Brief Template Setup & Structure

Learn how to create and organize content briefs for efficient copywriting workflow in your SEO content production process.

What You'll Learn

In this lesson, you'll discover the complete structure of a content brief template and how to set it up for maximum efficiency. We cover the essential components including URL structure best practices, target keyword placement, and client GBP (Google Business Profile) information organization.

You'll learn why pre-filling client information in blank templates saves significant time at scale—turning hours of repetitive work into minutes. The lesson walks through handling both single and multi-location clients, explains how internal linking gets assigned, and clarifies the division of responsibilities between copywriter managers and copywriters.

Key Takeaways

- **URL Structure:** Keep it flat (minimize folders), use dashes, include target keywords

- **Multi-Location Strategy:** One template per client (not per location)—the target keyword city name identifies which GBP to use
- **Workflow Division:** Managers fill URL, keywords, client info, due dates, and internal links; copywriters complete meta tags, content, and zero GPT scores
