Prompt 8: Technical SEO Implementation

You are a senior web developer and technical SEO specialist.

=====

SITE ARCHITECTURE – PASTE FROM PROMPT 0

=====

[PASTE YOUR COMPLETE SITE ARCHITECTURE FROM PROMPT 0 HERE]

=====

PART 1: SITEMAP.XML

=====

Create a sitemap.xml file that includes ALL pages on the sit

Structure:

- Use proper XML sitemap format
- Include lastmod date (use current date)
- Set priority levels:
 - Homepage: 1.0
 - Secondary Category pages: 0.8
 - Core Service pages: 0.8
 - Services page: 0.7
 - Child Service pages: 0.6
 - About page: 0.5
 - Contact page: 0.5
- Include changefreq: monthly for most pages, weekly for hor

Pages to include (from architecture):

- Homepage URL
- /services
- /about
- /contact
- All Secondary Category page URLs

=====

PART 2: ROBOTS.TXT

=====

Create a robots.txt file that:

- Allows all search engines to crawl all pages
- Points to sitemap location
- Blocks any admin, backend, or system routes if they exist

Format:

User-agent: * Allow: / Sitemap:
[https://\[yourdomain.com\]/sitemap.xml](https://[yourdomain.com]/sitemap.xml)

Block system/admin routes if applicable

Disallow: /admin/ Disallow: /api/

=====

PART 3: SCHEMA VERIFICATION

=====

Review all pages and verify schema markup is correctly imple

Homepage should have:

- LocalBusiness schema with:
 - @type: [Appropriate type for PRIMARY CATEGORY]
 - name: [BUSINESS NAME]
 - address (streetAddress, addressLocality, addressRegion,
 - telephone: [PHONE NUMBER]
 - email: [EMAIL]
 - url: homepage URL
 - areaServed: [SERVICE AREAS]
 - priceRange: "\$\$"
 - openingHours (if defined)
 - sameAs: [social media URLs when added]
- Service schema for primary service

**Optimizing for AI Syste...**

- @type: Service
- serviceType: [Category Name]
- provider: reference to LocalBusiness
- areaServed: [CITY], [STATE]
- description: brief service description

Disavowing Existing Backlin...

CORE SERVICE PAGES should have:

- Service schema with:
 - @type: Service
 - serviceType: [Service Name]
 - provider: reference to LocalBusiness
 - areaServed: [CITY], [STATE]
 - description: brief service description

CHILD SERVICE PAGES should have:

- Service schema with:
 - @type: Service
 - serviceType: [Service Name]
 - provider: reference to LocalBusiness
 - areaServed: [CITY], [STATE]

ABOUT PAGE should have:

- LocalBusiness or Organization schema
- Person schema for owner/team members (when real info added)

CONTACT PAGE should have:

- ContactPage schema or LocalBusiness with contact details

Ensure all schema:

- Is valid JSON-LD format
- Is placed in the <head> of each page
- Has consistent business information across all pages
- Uses the same @id reference for LocalBusiness throughout

=====

PART 4: META TAG VERIFICATION

=====

Verify every page has:

Title Tags:

- Present and unique on each page
- Under 60 characters

Meta Descriptions:

- Present and unique on each page
- Under 160 characters
- Compelling and includes call to action
- Includes primary keyword naturally

H1 Tags:

- Every page has exactly ONE H1 tag
- H1 includes page's target keyword
- H1 matches the page's purpose

Heading Hierarchy:

- Proper structure: H1 → H2 → H3 (no skipping levels)
- H2s used for main sections
- No pages with multiple H1s

=====

PART 5: INTERNAL LINK AUDIT

=====

Verify the linking structure matches INTERNAL LINKING MAP for

HOMEPAGE links to:

- All Secondary Category pages (via H2 sections)
- All Core Service pages (via H2 sections)
- Services page (via "View All Services" link)
- About page (via navigation)
- Contact page (via navigation)

SECONDARY CATEGORY PAGES link to:

- All child services listed under that category
- Homepage (via natural anchor text in content)

CORE SERVICE PAGES link to:

- All child services listed under that core service
- Related secondary category if defined in architecture
- Homepage (via natural anchor text in content)

CHILD SERVICE PAGES link to:

- Their parent page (category, core service, or homepage for)
- As defined in INTERNAL LINKING MAP

- All Child Service pages (via cards)

ALL PAGES link to:

- Homepage (via logo and navigation)
- Services, About, Contact (via navigation)

Verify:

- No broken internal links (404s)
- No orphan pages (pages with no internal links pointing to)
- All links use clean URLs (no anchor tags # unless intentional)
- All links load destination page at TOP (ScrollToTop working)

=====

PART 6: MOBILE OPTIMIZATION

=====

Verify on all pages:

Click-to-Call:

- All phone numbers are clickable tel: links
- Phone numbers work on mobile devices

Mobile Navigation:

- Hamburger menu functions correctly
- All menu items accessible
- Menu closes after selection

Floating CTA:

- "Call Now" floating button visible on mobile
- Positioned bottom right
- Doesn't obstruct content
- Links to tel: number

Touch Targets:

- All buttons minimum 44x44 pixels
- Adequate spacing between clickable elements
- Forms easy to use on mobile

Responsive Design:

- No horizontal scroll on any page
- Text readable without zooming
- Images scale properly
- Layout adapts to screen sizes

=====

Verify/implement:

Images:

- All images compressed/optimized
- Images use modern formats where possible (WebP)
- Images have width and height attributes
- Lazy loading on images below the fold
- Alt text on all images

Code:

- CSS and JS minified
- No render-blocking resources where avoidable
- Clean, efficient code

Performance:

- Target Lighthouse score of 80+ on mobile
- No excessive third-party scripts

=====

PART 8: 404 PAGE

=====

Create a custom 404 error page that:

Design:

- Matches site design (header, footer, colors)
- Friendly, helpful message
- Not generic server error page

Content:

- Heading: "Page Not Found" or "Oops! That page doesn't exist"
- Brief message: "The page you're looking for may have moved or is no longer available"
- Helpful options:
 - Link to Homepage
 - Link to Services page
 - Phone number with "Or call us directly"
- Search box (optional)

Do not:

- Show technical error codes prominently
- Leave user stranded with no navigation

=====

Canonical Tags:

- Every page has a self-referencing canonical tag
- Format: `<link rel="canonical" href="[full page URL]" />`
- Prevents duplicate content issues

Favicon:

- Favicon present
- Shows in browser tab
- Placeholder if not provided: `<!-- Add your favicon -->`

Open Graph Tags (for social sharing):

- `og:title`
- `og:description`
- `og:image` (placeholder if needed)
- `og:url`
- `og:type: website`

Language:

- `<html lang="en">` on all pages

Viewport:

- `<meta name="viewport" content="width=device-width, initial-scale=1">`

=====

PART 10: FINAL VERIFICATION CHECKLIST

=====

Run through this checklist and confirm each item:

Site Structure:

- ☐ Total pages created matches PAGE COUNT SUMMARY from arcl
- ☐ All pages accessible via navigation or internal links
- ☐ No orphan pages
- ☐ No broken links

Technical SEO:

- ☐ sitemap.xml created with all pages
- ☐ robots.txt created and properly configured
- ☐ Schema markup on all pages (valid JSON-LD)
- ☐ Meta titles unique and under 60 characters
- ☐ Meta descriptions unique and under 160 characters

Internal Linking:

- [] Homepage links to category and core service pages
- [] Category/core service pages link to child pages
- [] Child pages link back to correct parent
- [] All links load pages at TOP (no scroll issues)
- [] No anchor tags (#) in internal links unless intentional

Mobile:

- [] Click-to-call working on all phone numbers
- [] Mobile navigation working
- [] Floating "Call Now" button visible
- [] No horizontal scroll
- [] Touch targets adequate size

Performance:

- [] Images optimized
- [] Lazy loading implemented
- [] No major render-blocking issues

Pages:

- [] 404 page created and styled
- [] Canonical tags on all pages
- [] Open Graph tags on key pages

Placeholders Documented:

- [] GBP embed locations noted
- [] Reviews widget location noted
- [] Contact form handler noted
- [] About page content placeholders noted

=====

OUTPUT

=====

After completing all technical SEO tasks, provide:

1. Confirmation that sitemap.xml and robots.txt are created
2. List of any schema errors found and fixed
3. List of any broken links found and fixed
4. List of any pages missing required elements
5. Final page count verification
6. Any recommendations for improvement
