Where to Start in AI SEO Mastery Pro

This course is designed as a reference library you'll return to over time—not something you need to watch front-to-back. Depending on where you are, here's your recommended starting point:

Brand new to SEO: Start with the SEO Foundation section to understand how Google works, how authority is passed, and what E-E-A-T means before diving into tactics.

Have a client or business and need results now: Jump straight to How to Do Local AI SEO. This walks through a typical engagement, the three phases of local SEO, scoping work, pricing, and building out the Core 30.

Already know SEO but want the AI workflows: Head to Creating AI Content and grab the internal copywriting system—it's the exact process my team uses daily.

Just need GBP help: The Google Business Profile section is self-contained and covers everything from verification to posts to reviews.

If you're ever unsure what to do next, come back to the Three Phases of Local SEO lesson. It's the roadmap that shows where everything else fits.
